

How Would You Change The World To Make It Better?

By Lawrence Zhen

Age 6

To make the world a better place, everyone needs to contribute. I can't do much because I'm a kid, but I can do a little bit. I help my mom plant trees, which makes the world prettier and healthier. I help around the house; I do take out the garbage, recycle, and try not to waste food or water.

My help doesn't stop there. I help my friends with their homework if they don't understand it. I help my neighbors wash the car. I also carry bags of food in for my parents every time they go shopping.

To sum it up, I help out my family, friends and neighbors. Other kids can do the same, if only they wanted to. In order to make the world a better place, everyone needs to do their part.
